Civil Engineering Department

Date: 06 Jan 2017

NOTICE

Certification Course on "Construction Management"

This is to inform you that "Training on Construction Management" will start from 13-Jan-2017 [Timing: Every Saturday (10AM- 1PM)] for Civil Engineering (6thsem) Students.

Interested candidates can send their names to the undersigned as soon as possible.

Mr. Hemant Kumar
In-charge & Trainer
Civil Engg. Meerut Institute of Technology, Meerut

Mr. Ankit Kumar
HOD, Civil Engineering Department
Meerut Institute of Technology, Meerut

MEERUT INSTITUTE OF TECHNOLOGY

(Approved by AICTE & Affiliated to U.P. Technical University, Lucknow)

NH-58, Baral Partapur, Bypass Road, Meerut - 250 103, U.P., INDIA

COURSE CONTENTS

- **Building Information Modeling Foundation**
- **Financial and Asset Management**
- **Research Project**
- **Building Information Modeling and Sustainability Practice**
- **Contemporary Issues and Research in Project Management**
- **Contract Management Practice and Law**
- **Integrated Project – Construction**
- **Organizational Theory and Behaviour**
- **Project and System Management**

Notice

All students of CSE III year are hereby informed that a 15 days workshop on "Java" will commence from 04-07-16 as per the following schedule:

Timing	Venue
10:00 AM to 04:00 PM	A-209

The interested students may contact Mrs. Nidhi Parasar for the conduction of this workshop.

(Ajai Verma)

HOD - CSE

Copy to:

1. The Director, MIT
2. CSE Faculty Members, for information.

Meerut Institute of Technology, Meerut
Department of Computer Science and Engineering
Java Workshop (Session: 2016 - 2017)

Course Structure

S.No.	Day	Topic
		Java Basics
1	1	Features of Java
2		OOPs concepts
3		Java virtual machine
4		Byte code
5		Data types, variable, arrays, expressions, operators, and control structures
6		Writing Java Programs
		Introduction to Objects and Classes
7	2	Data Members and Member Methods
8		Declaring and Creating Objects
9		Constructors
10		Function & Constructor Overloading
11		"this" and "static" Keywords
12		Inner Classes
		Inheritance
13	3	Inheritance Basics: Super Class and Sub Class, Types
14		Constructor in Inheritance: "super" keyword
15		"final" Keyword
16		Method Overriding
17		Dynamic Method Dispatch
18		Abstract Classes
		Packages
19	4	Package Basics: Namespace Resolution, Visibility Control
20		Defining a package
21		Directory Structure of Packages
22		Importing a package
23		Access Control
24		Java API Packages
		Interfaces
25	5	Interface Basics: Need, Relationship with classes
26		Defining an Interface
27		Implementing Interfaces
28		Inheritance in Interfaces
29		Using Interfaces for Multiple Inheritance
30		Difference between abstract classes and interfaces
		Exception Handling
31	6	Exception Handling Basics: Types, Java's Implementation Strategy
32		Java's Built in Exceptions
33		Java's Exception Class Hierarchy
34		Exception Handling Keywords: try, catch, finally, throw & throws
35		Checked and Unchecked Exceptions
36		User defined Exceptions
		Multithreading
37	7	Multithreading Basics: Threads, Processes, Thread Life Cycle
38		Implementing Threads: Thread Class
39		Implementing Threads: Runnable Interface
40		Useful Thread Methods: isAlive, join, run, sleep & start
41		Synchronization
		Generics
42	8	Generics Basics: Concepts
43		Type Arguments
44		Generic Classes
45		Generic Methods
46		Generic Interfaces

Meerut Institute of Technology, Meerut
 Department of Computer Science and Engineering
 Java Workshop (Session: 2016 - 2017)

Course Structure

S.No.	Day	Topic
		Java IO
47	9	Java IO Basics: Streams
48		Byte Streams
49		Character Streams
50		Taking User Input through Streaming
51		File Handling
52		Serialization
		Collections Framework
53	10	Collections Overview
54		Collections with generics
55		Collection Interfaces
56		Collection Classes
		Introduction to Java GUI - Applets & AWT
57	11	Java as Internet Programming Language
58		Applets
59		AWT
60		Layout Managers
61		Working with Windows and Graphics
62		Working with text
		Introduction to Java GUI - Exploring Swing
63	12	Swing
64		Difference between AWT & Swing
65		User Interface Components
66		Containers
67		Event Handling
		Java Database Connectivity (JDBC)
68	13	JDBC Overview
69		JDBC Drivers
70		Establishing a connection
71		Executing Queries
72		Processing the results
73		Closing the connection
		Some other important concepts in Java
74	14	Difference between String, StringBuffer and StringBuilder Classes
75		"Object" class
76		Type Wrappers or Wrapper Classes
77		Autoboxing/ Unboxing
78		Garbage Collection (finalize() method)
79		Adapter Classes
		Software Development in Java
80	15	Formatter Classes
81		Regular Expressions
82		Introduction to Software Development
83		Internal Documentation in Java programs
84		Project Discussion
85		Certification Test

A
REPORT OF Workshop
ON
JAVA WORKSHOP
DATE
04/07/2016 to 18/07/2016

SUBMITTED BY
Department of Computer Science and Engineering,
MIT, Meerut

SUBMITTED TO
Director, MIT

A workshop was organized on "java" for the duration of 04-07-16 to 18-07-16. This is held once in a year. Time duration of the course was 15 days. 16 students enrolled in course. Java is one of the most popular languages in the world. It is used by some 9 million developers and it runs on around 7 billion devices worldwide according to Oracle blogs. Because of the high demand for Java, Java developers are also quite sought after and they hold some of the most high-paying jobs in the industry.

Java has an abundant Application Programming Interface (API) that includes many Java classes, packages, interfaces, etc. This is useful for constructing applications without necessarily knowing their inside implementations. Java has mainly three types of API i.e. Official Java core API's, Optional official Java API's and Unofficial API's. These API's overall are used for almost everything including networking, I/O, databases, media, XML parsing, speech synthesis, etc.

Java has an abundant Application Programming Interface (API) that includes many Java classes, packages, interfaces, etc. This is useful for constructing applications without necessarily knowing their inside implementations. Java has mainly three types of API i.e. Official Java core API's, Optional official Java API's and Unofficial API's. These API's overall are used for almost everything including networking, I/O, databases, media, XML parsing, speech synthesis, etc.

Open source libraries have resources that can be copied, studied, changed, shared, etc. There are multiple open source libraries in Java such as JHipster, Maven, Google Guava, Apache Commons, etc. that can be used to make Java development easier, cheaper and faster.

There are many integrated development environments (IDE's) in Java that provides various facilities for software development to programmers. Powerful Java IDE's such as Eclipse, NetBeans, IntelliJ IDEA, etc. play a big role in the success of Java.

These IDE's provide many facilities such as debugging, syntax highlighting, code completion, language support, automated refactoring, etc. that make coding in Java easier and faster.

One of the reasons Java is very popular among individual programmers is that it is available under the Oracle Binary Code License (BCL) free of charge. This means that Java is free for development and test environments, but for commercial purposes, a small fee is required.

Java is platform-independent as the Java source code is converted to byte code by the compiler which can then be executed on any platform using the Java Virtual Machine. Java is also known as a WORA (write once, run anywhere) language because it is platform-independent. Also, the development of most Java applications occurs in a Windows

environment while they are run on a UNIX platform because of the platform-independent nature of Java.

Java is very versatile as it is used for programming applications on the web, mobile, desktop, etc. using different platforms. Also, Java has many features such as dynamic coding, multiple security features, and platform-independent characteristics, network-centric designing, etc. that make it quite versatile. After doing this training their skill will improved and getting better jobs. After the completion of the workshop, students become proficient in that language and they done mini projects that gives students deep idea about java. Before this workshop students have negligible knowledge about java, but after that workshop students become adept with this language.

Date: 26-12-16

Notice

All students of CSE/ ITIII year are hereby informed that a 15 days' workshop on "HTML, CSS and XML" will commence from 02-01-17 as per the following schedule:

Timing	Venue
10:00 AM to 04:00 PM	A-211

The interested students may contact Mrs. Shilpi Gupta for the conduction of this workshop.

Meerut Institute of Technology, Meerut
Department of Computer Science and Engineering
HTML, CSS, XML Workshop (Session: 2016 - 2017)

Course Structure

Sr. No.	Day	Topic
1	1, 2	HTML Introduction
2		HTML page structure
3		HTML DOCTYPE
4		HTML tags – Heading, paragraph, anchor, lists – unordered, ordered, definition, text formatting tag, alignment
5	3	Working with images
6		Tables
7		Frames
8		Marquee
9		New tags in HTML5
10	4	Forms
11		Iframe
12		HTML Comments
13	5, 6	Java Script Introduction
14		Include Java Script in HTML Page
15		Java Script Syntax
16		Display output using document.write
17		Dialog Boxes
18	7	Functions
19		DOM
20		Arrays
21		Objects
22	8	Form Validation
23		Event Handling
24		Error Handling
25	9	Page Redirect
26		Browser Detection
27		Cookies
28		Animation
29		Regular Expression

Meerut Institute of Technology, Meerut
Department of Computer Science and Engineering
HTML, CSS, XML Workshop (Session: 2016 - 2017)

Course Structure

Sr. No.	Day	Topic
30	10, 11	CSS – Introduction
31		Syntax
32		4 ways to include CSS
33		Background
34		Border
35		Margin
36		Padding
37		Text
38		Font
39		Lists
40	12	Pseudo classes
41		Pseudo elements
42		Class and id
43		Multiple columns
44		Gradient, shadows
45	13	Box Model
46	14, 15	XML - Introduction
47		XML - Declaration, Tags, Elements, Attributes, Comments
48		XML - DTDs
49		XML - Schemas

A
REPORT OF WORKSHOP
ON
“HTML, CSS, XML”

DATE
02-01-17 to 16-01-17

SUBMITTED BY
Department of Computer Science and Engineering,
MIT, Meerut

SUBMITTED TO
Director, MIT

A workshop was organized on "HTML, CSS and XML for the duration of 03-07-17 to 17-07-17. It was offered once in a year. Time duration of the course was 15 days. 16 students enrolled in course. Student will be able to fine-tune their site's blog posts or even their whole theme.

Almost all the browsers around the globe are supported by HTML. So there is no need to worry about the website written in HTML for the browser support as the website would easily show up in all the browsers if the program keeps in mind to optimize the website for the different browsers. HTML provides an easy way to optimize the website in HTML according to browsers to the web developers.

For the programmer to be either frontend or backend developer, one must have knowledge of HTML as it is the basic language and all the other languages integrate with it while coding like JavaScript, JSP, Php, etc. Similarly, XML syntax is just like HTML and XML which is used widely these days for data storage. If one has good knowledge of HTML, it is easy working with XML too for him.

For those of students who want become professional Web developers, knowledge of HTML is required. Ask experienced web designers about the importance of learning these two languages. Only a few of them will say you can get by without them, and the vast majority will recommend that you learn to use one or both of them.

Students can start making money with HTML and CSS skills ALONE. Search the web and see for yourself. Students will find dozens of available HTML and CSS freelance jobs. Of course, students can earn more as you learn more by adding other skills, like JavaScript, PHP, Photoshop, and more ,

One of the biggest advantages of HTML is that one can see the changes instantly just by saving it and reload the previous HTML page. Unlike other programming languages, there is no need to run the whole code and finding out where the error is. HTML can be easily integrated with multiple languages and does not create any issues in it. For example in Javascript, Php, node.js, CSS and many more, we write the code of these languages between the HTML and it mixes with them very easily.

HTML is one of the most friendly search engines in comparison to all the programming languages available in the market (Search Engine friendly means delivering users quality websites with relevant information when searched for a particular one). It is quite easier to create SEO compliant websites using HTML than other programming languages. HTML websites are easier to read and accessed by web crawlers and hence reduces parsing time and the page load time of the website hence improving its performance.

Learning a little bit of HTML and CSS now might not seem like the most important thing to do. But the benefits of learning something about code pile up over time.

As you've seen from the points above, there are all kinds of situation where a little coding knowledge could save you time and money, or could enable you to contribute more to a team project. But the other key benefit is that your confidence will grow (alongside your knowledge) over time. It's difficult to avoid the web nowadays, no matter what work you do. And since the internet provides instantaneous communication and access to endless apps that boost your productivity, it's best to embrace it and despite how complex some websites and apps might be overall, they are still built with the fundamental blocks of the web: HTML and CSS. So if students start learning just a little of these languages today, over time your knowledge will grow and increase your confidence with it.

After the completion of the workshop, students become proficient in that language and they done mini projects that gives them deep idea about this language. Before this workshop students have negligible knowledge about language, but after that workshop students become adept with this language

"C++" Course Contents

1. Programming basics and overview

- Computer programming background
- C++ overview
- First C++ application
- Basic C++ syntax
- Using our IDE
- Basic Input and Output
- Variables

2. Flow control

- If statements
- And, Or
- Switch
- Loops ~ While, Do, For

3. More basic concepts

- Working with pointers
- Memory management
- Arrays
- Strings
- Handling Exceptions
- Basic debugging skills

4. OOP basics and details

5. Files & Network basics

Mechanical Engineering Department

Date: 4 Jan 2017

NOTICE

Training on "CATIA"

Timings: Every Saturday (10AM- 1PM)

Only for Mechanical Engineering (6th sem) Students from 13-Jan-2017

Interested candidates can send their names to the undersigned as soon as possible.

Mr. Kapil Tyagi
In-charge & Trainer
MED, Meerut Institute of Technology, Meerut

Mr. Arun Sharma
HOD, Mechanical Engineering Department
Meerut Institute of Technology, Meerut
