Concluding Remarks

Department of Computer Application has organized a training program named "Test your 'C' skills – a certificate program" from 08 April 2019 to 13 April 2019 for the students of BCA (Batch 2018-21). Mr. Akhilesh Pandey, the trainer, imparted the training to the students about the basics of "C" Programming. The students learned about the programming fundamentals, Operators, Control Instructions, Functions, Array and Pointers. The Principal and the trainer awarded the certificate to each participant for the successful completion of their rigorous training.

Students were glad and promised to practice all these learning.

Thanks

Mr. Akhilesh Pandey

Certificate program on "Standardization of Herbal Drugs"

The use of herbal drugs as medicine is the ancient form of health care known to delicacy and it is used in all cultures throughout history. India can emerge as the major country and play the lead role in production of standardized, therapeutically effective herbal formulation. Researcher needs to explore the medicinally important plants. This can be achieved only if the herbal drugs are evaluated and analyzed. Keeping this in mind, **Department of Pharmacy Meerut Institute of Technology** conducted a **certificate program on "Standardization of Herbal Drugs"** for the students from **31st December 2018 to 5th January 2019**.

Forty five students registered for the program. Dr. Sameksha Koul, Associate Professor, Meerut Institute of Engineering & Technology, speaker for day 1 & 2 delivered lectures on introduction of standardization and role to the students.

Prof. S.K Gupta, Director, Department of Pharmaceutical Technology, Meerut Institute of Engineering & Technology, speaker for day 3 & 4 has taught and performed the experimental work based on botanical and physico-chemical parameters of herbal drugs such as macroscopy and microscopic characteristics and extractive values.

Ms. Manjari Verma, Assistant Professor, Department of Pharmacy, Meerut Institute of Technology, speaker for day 5 & 6 has taught and performed the experimental work based on General Parameter of herbal drugs.

The program conducted successfully and certificates distributed to the students.

Syllabus

Computer Fundamentals

Scope: This subject deals with the introduction Database, Database Management system, computer application in clinical studies and use of databases.

Objectives: Upon completion of the course the student shall be able to

1. Know the various types of application of computers in pharmacy.
2. Know the various types of databases.
3. Know the various applications of databases in pharmacy.

Unit I

08 hours

Number system: Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction – One's complement, Two's complement method, binary multiplication, binary division. **Concept of Information Systems and Software :** Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project

Unit II

08 hours

Web technologies: Introduction to HTML, XML, CSS and Programming languages, introduction to web servers and Server Products.

Introduction to databases, MYSQL, MS ACCESS, PharmacyDrug database.

Unit III

08 hours

Application of computers in Pharmacy – Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy. Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring

Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System.

Unit IV

08 hours

Bioinformatics: Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery.

UnitV

08 hours

Computers as data analysis in Preclinical development: Chromatographic data analysis (CDS), Laboratory Information management System (LIMS) and Text Information Management System (TIMS)

Training was organized on "OBJECT ORIENTED PROGRAM WITH C++" for the duration of 02-07-18 to 12-07-18. It was offered once in a year. Time duration of the course was 11 days. 12 students enrolled in course.

OOP (object-oriented programming) is a programming paradigm that is completely based on 'objects'. A general explanation of 'object' for better understanding – Mr. A is going to build a POT with the use of blocks. Blocks are a kind of measurement units like height, radius, and shape by default. These properties are there by default, which means if you use a block it has some dimensions associated with it. Now there are some other crucial properties that are not yet assigned like – color, material, and price. So, Objects are nothing but POTS. We build an object by assigning values to the properties when we need them. BLOCK is nothing but the templates of the object. Moving to the advantages of OOP, we would like to say that there are many as this is one of the core development approaches which is widely accepted. Re-usability means reusing some facilities rather than building it again and again. This is done with the use of a class. We can use it 'n' number of times as per our need.

Data Redundancy is a condition created at the place of data storage (you can say Databases) where the same piece of data is held in two separate places. So the data redundancy is one of the greatest advantages of OOP. If a user wants a similar functionality in multiple classes he/she can go ahead by writing common class definitions for the similar functionalities and inherit them.

Code Maintenance is feature is more of a necessity for any programming languages, it helps users from doing re-work in many ways. It is always easy and time-saving to maintain and modify the existing codes with incorporating new changes into it.

Some of the job opportunity student get after learning are one of the striking applications of C is the development of an embedded system as C is closely associated with the machine level language easily understood by the compiler. As an embedded engineer, you would be expected to develop embedded systems.

Database Developer, this position is required in almost each and every company as it is of utmost importance to maintain a database for an organization to function. The position of a database developer is high in demand. Your task would be to design and modify databases and deal with troubleshooting issues.

Computational Biologist is a striking career. Student will be expected to develop algorithms and models to understand biological systems and models.

Backend Developer also called a server-side developer, your task would entail to carry on all the off-page activities of your company's website. Your primary focus would be on the database management system, scripting, and architecture of your company's website.

Database Developer This position is required in almost each and every company as it is of utmost importance to maintain a database for an organization to function. The position of a database developer is high in demand. Your task would be to design and modify databases and deal with troubleshooting issues.

After the completion of the workshop, students become proficient in that language and they done mini projects that gives students deep idea about language. Before this workshop students have negligible knowledge about language, but after that workshop students become adept with this language

Training was organized on "DATA SCIENCE USING R" for the duration of 02-07-18 to 11-07-18. It was offered once in a year. Time duration of the course was 10 days. 10 students enrolled in course.

The different job prospects after doing data science are Data scientist, Data analyst, Data engineer, Statistician, Machine learning engineer, Machine learning scientist, Data architect, Business analyst, Business intelligence developer.

A data scientist is someone who is able to extract valuable information out of the given data. A data scientist's job usually involves conducting predictive analysis, and utilising machine learning and related tools to extract data. The data received by any company is often muddled and needs cleaning, and that is where data scientists come into the picture. A data scientist is expected to clean and present the data in a manner that can benefit the company. A business intelligence developer is a unique and important designation in any organisation. As a branch of artificial intelligence, business intelligence development is necessary to collect and analyse complicated data to decipher and predict business and market trends. A business intelligence developer is expected to design, remodel, and hold complicated data in an accessible cloud-related platform.

A big data engineer and architect is one of the most lucrative artificial intelligence and data science career options. Every big data engineer and architect is tasked with creating a system through different areas of a business can communicate with one another effectively, and collect data with ease. Big data engineers and architects are expected to be experts at computer programming and computer languages like C++, Java, Python, and Scala.

A database developer is expected to improve prevailing database processes, and updating the business standards and structures by effectively coding programmes. Each database developer is also tasked with maintaining existing databases, detecting and fixing bugs in the system, improving the existing database, and solving any issues or concerns that may rise up in the database systems along the way in the future.

Many multinational companies and organisations hire graduates in data science and artificial intelligence. Over the last few years, Amazon, Microsoft, Adobe, Uber, Samsung, Intel, Accenture, Facebook, Netflix, and Lenovo have been some of the top recruiters in the data science and artificial arena. Studies show that there is going to be a spurt in the number of jobs in this industry. This training provides good opportunity to students to make the life better by getting high paying jobs.

After the completion of the workshop, students become proficient in that language and they done mini projects that gives students deep idea about this language. Before this workshop students have negligible knowledge about the language, but after that workshop students become adept with this language.

Training was organized on "INTRODUCTION TO SAP USING GBI" for the duration of 09-07-18 to 18-07-18. It was offered once in a year. Time duration of the course was 20 days. 20 students enrolled in course.

SAP ABAP is a fourth generation language and termed as ABAP/4, and the term SAP ABAP stands for Advanced Business Application Programming. The current version of ABAP is object oriented; the programming language is now official called as SAP ABAP Objects. By using ABAP, you can easily write the entire SAP application as per project.

Benefits of SAP training are acquire the skills and knowledge needed to tackle the most challenging projects, wider spectrum of opportunity in the global market, Competitive edge to meet the strategic goals of your organization, Gain international recognition and instill client confidence, Our instructors are practicing SAP consultants having in-depth product knowledge, project implementation experience and proficient course delivery skills.

SAP is one of the number one providers of business software solutions towards better work and data management in organizations across industries. When Systems, Applications & Products in Data Processing (SAP) was founded in June, 1972, it was centered to only A type or big businesses. However over a period of time, small and medium size companies adopted SAP towards achieving organizational goals and today SAP is the leader in enterprise applications.

Various SAP modules have been developed over time focused on different areas. Professionals can become SAP Network Specialists, SAP FI/CO course for finance and accounting control, SAP Database Administrators, SAP Security consultants etc. On the other hand, management professionals can opt for SAP customer relationship management, SAP business intelligence, SAP sales and distribution, SAP business information warehouse and more.

SAP offers software for the business world and a host of their solutions are management based. SAP HCM module is the apt software for the HR department of an organization. The

job of an HR is much beyond just recruiting. From hiring professionals to managing details of designation, payment, compensation, promotion etc., are taken care by the HR. SAP HCM module enables one to keep a better track of everything. There are various sub-modules of SAP HCM for different processes such as organizational management, personnel administration, e-recruitment, time management, payroll, ESS and MSS, and reporting. Organizational management manages the human resources of an entire organization towards achieving a set goal; personnel administration on the other hand manages details like compensation, performance appraisal and so on. E-recruitments enhances the recruitment processes of an organization, time management enables better management of work and time of employees, payroll manages the payment details and so on.

SAP Sales and Distribution is the ideal software for every organization that helps in managing master data, system configuration, order and cash process related transactions and more. Using this module, organizations can better manage their Customer Master and Material Master Data, Sales Orders, Deliveries, Pricing, Billing and Credit processes and so on. There are various sub-modules of SAP SD for different processes such as Master Data, Sales Support, Pendulum List Indirect Sales, Sales, Shipping and Transportation, Billing, Empties Management, Credit Management, Foreign Trade and Sales Information System. Each SAP SD module provides easy and swift management of task lists within the broader process of Sales and Distribution.

After the completion of the workshop, students become proficient in that language and they done mini projects that gives students deep idea about this language. Before this workshop students have negligible knowledge about the language, but after that workshop students become adept with this language.

A
REPORT OF WORKSHOP
ON
“WIPRO TALENTNEXT”

DATE
19-06-19 to 10-07-19

SUBMITTED BY
(H.O.D, C.S.E)

SUBMITTED TO
Director, MIT

In this training, we give guidance to the student, so that students are capable of cracking WIPRO exam which happen every year. In this training program, we provide classes of Aptitude, Coding and English classes.

Training was organized on "Wipro TalentNext" for the duration of 19-06-19 to 10-07-19. It was offered once in a year. Time duration of the course was 22 days. 21 students enrolled in course.

In the aptitude classes we give idea to students about which topic is important and how to crack the question in time, which question is attempt first and which to last and how to score better. This training helps the students to think logically and improve rational thinking and we provide puzzles so that their brain is trained to think out of the box as a result student catch the question even interviewer asked the which perplexed the brain in one go. This training makes the students better.

In this training, we provide coding classes in these classes student get an idea that how learn logically and how to understand the coding question and how to understand the question make logic in mind and how to implement and give practice sheet so that they learn become proficient in programming.

We also provide English classes, in this practice session is provided and some topic is given and student have to speak in front of everyone so that their fear of not speaking well is flush out as a result student become proficient in english.

Training was organized on "Wipro TalentNext" for the duration of 09-07-18 to 18-07-18. It was offered once in a year. Time duration of the course was 10 days. 6 students enrolled in course.

In this training, we give guidance to the student, so that students are capable of cracking WIPRO exam which happen every year. In this training program, we provide classes of Aptitude, Coding and English classes.

In the aptitude classes we give idea to students about which topic is important and how to crack the question in time, which question is attempt first and which to last and how to score better. This training helps the students to think logically and improve rational thinking and we provide puzzles so that their brain is trained to think out of the box as a result student catch the question even interviewer asked the which perplexed the brain in one go. This training makes the student better.

In this training, we provide coding classes in these classes student get an idea that how learn logically and how to understand the coding question and how to understand the question make logic in mind and how to implement and give practice sheet so that they learn become proficient in programming.

We also provide English classes, in this practice session is provided and some topic is given and student have to speak in front of everyone so that their fear of not speaking well is flush out as a result student become proficient in english.
