MODERN APPROACHES OF SOIL HEALTH

Course Introduction	
Topics	
Day -1, 07-1-2020	**Lecture hours**
What is Soil health, importance of soil health in modern agriculture?	1
Effect of good soil health on crop production as well as soil productivity.	1
Improvement of soil by using various soil health management practices.	1
Reclamation of degraded soil or unhealthy soil by physical, Mechanical, biological and chemical methods.	2
Day -2, 08-1-2020	
How to good soil health beneficial for the soil microbes, plant growth and soil fertility.	1
Effect of traditional agriculture on soil health, soil quality and plant growth.	2
Modern scenario of soil heath management.	1
Effect of Pedological and Edaphological properties on soil health.	1
Day -3, 09-1-2020	
How soil health depends on the physical, chemical and biological properties of soil. Such are soil texture, bulk density, soil pH, soil EC, etc.	2
Effect of sources of organic and inorganic fertilizer on soil health and their properties.	1
Microbial population: Mineralization, Immobilization, Nitrification etc.	1
Difference between soil fertility and soil productivity in relation to soil health.	1
Day -4, 10-1-2020	

Concept of world Soil Day 2019	2
About the theme of world Soil Day 2019 (Stop Soil Erosion, Save Our Future)	2
Conclusion	1
Day -5, 11-1-2020	
Understanding the valuable practices to save soil health for future:	1
Control of degraded soils by advanced technologies.	1
Soil organic matter, humus formation and its importance in soil fertility, management and maintenance of organic matter in soils for sustainable soil health.	2
Case studies of typical reclamation of saline sodic soils of india	1
Day -6, 12-1-2020	
Study about the Concept of Soil Health Card.	2
Parameters in Soil Health Card.	2
Benefits of Soil Health Card for farmers.	1

Certificate program on "Pharmacovigilance for Medical Products"

Pharmacovigilance and drug safety is the pharmacological science relating to the collection, detection, assessment, monitoring, and prevention of adverse effects with pharmaceutical products. This program organized by **Department of Pharmacy Meerut Institute of Technology** to enhance pharmacovigilance knowledge and skills of the healthcare professionals from **30th December 2019** to **4th January 2020**.

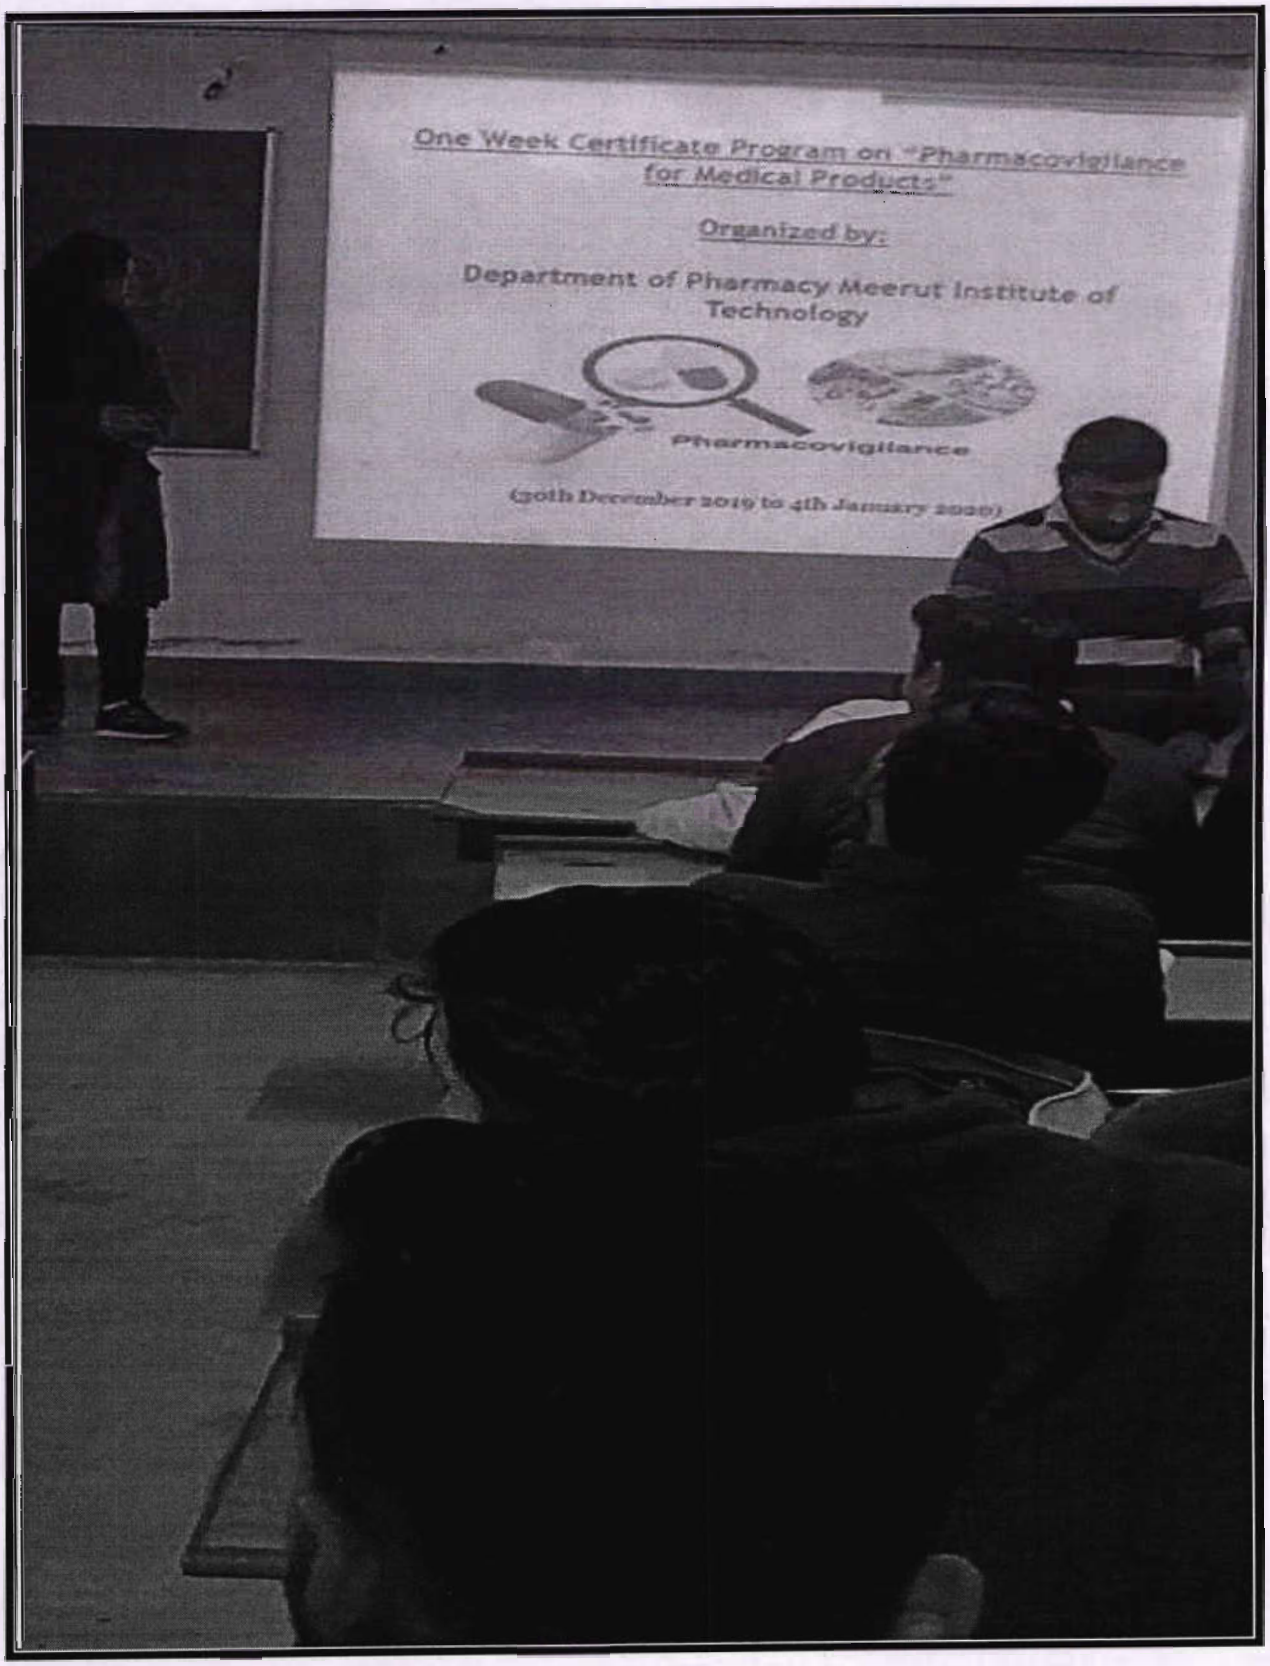

Thirty students registered for the program. Mr Avnesh Singh, Assistant Professor, Department of Pharmaceutical Technology, MIET, speaker for day 1 delivered lectures on the basic concepts of Pharmacovigilance, adverse drugs reactions and assessment of ADRs to the students.

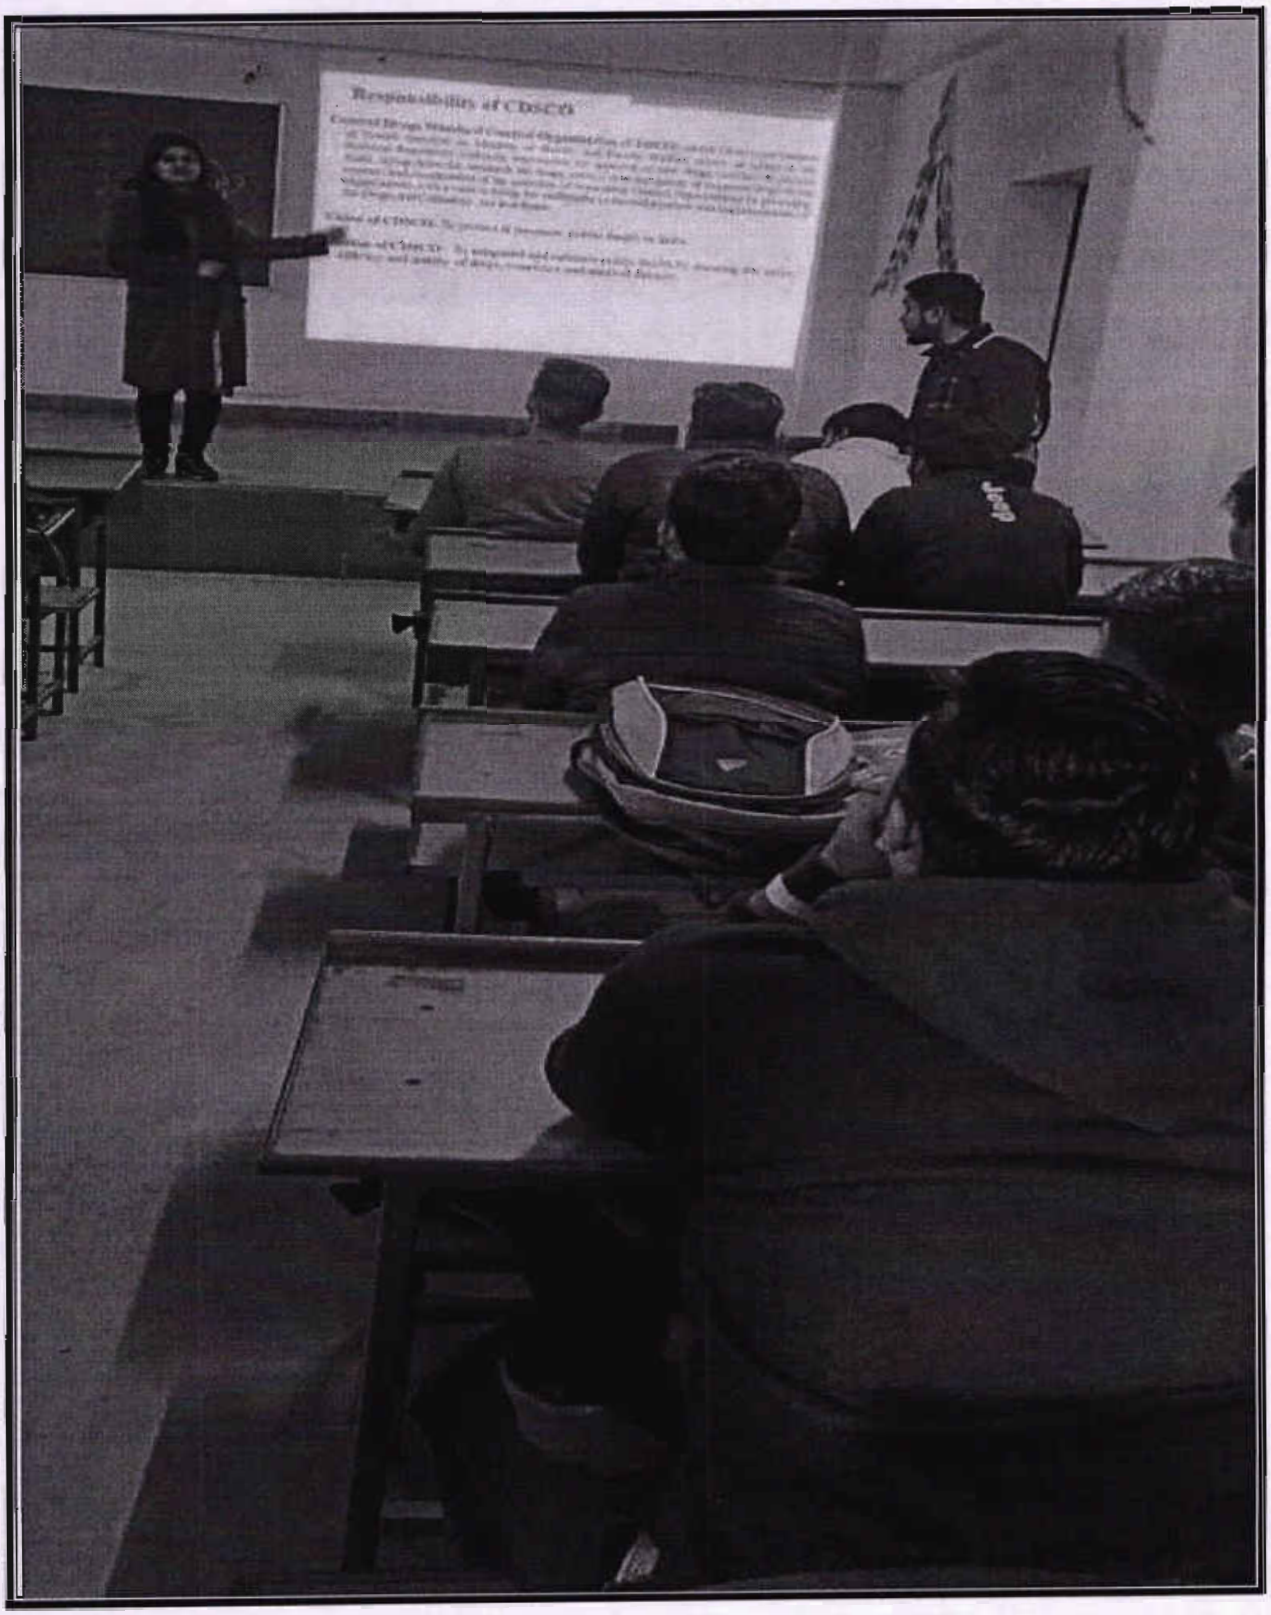

Ms Preeti Choudhary, Assistant Professor, Department of Pharmaceutical Technology, Meerut Institute of Engineering & Technology, speaker for day 2 delivered lectures on the Introduction to Suspected ADR reporting form, Monitoring & Reporting AE's / ADR's and Establishing Pharmacovigilance system in Institutions/Hospitals to the students.

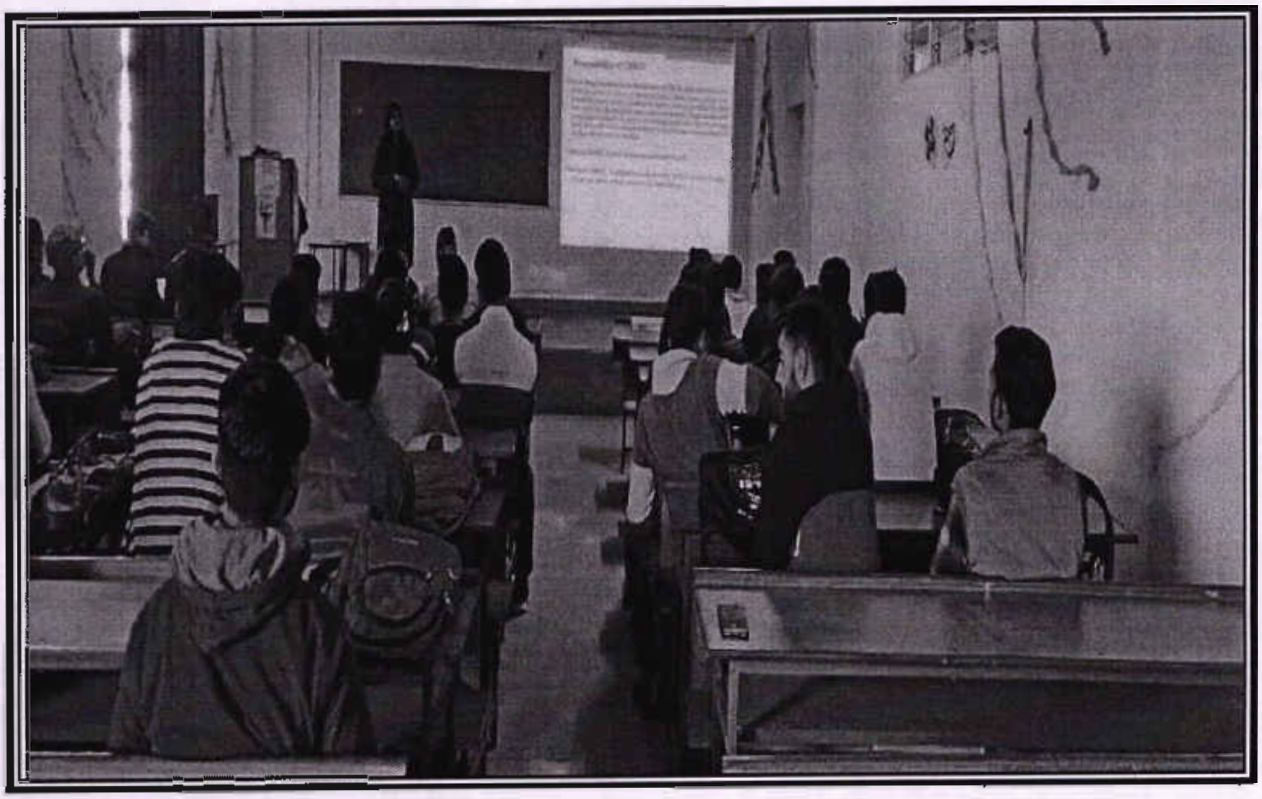

Dr Vipin Kumar Garg, Professor and Head of Department, Department of Pharmaceutical Technology, Meerut Institute of Engineering & Technology, speaker for day 3 & 4 delivered lectures on the sources of drug information & literature search, Medication Errors and its importance, Pharmacovigilance regulations in Drugs & Cosmetics rules 1945 and materiovigilance programme of India to the students.

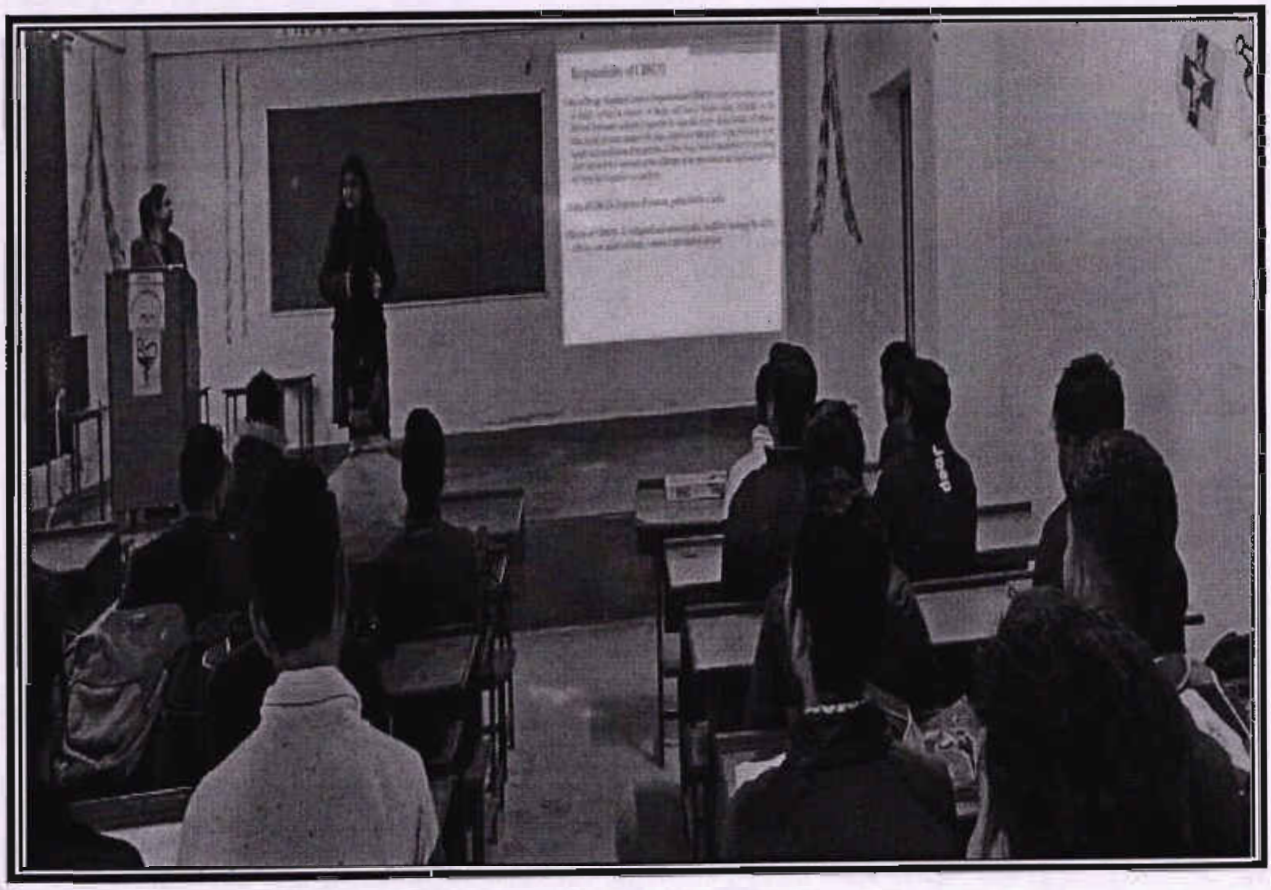

Ms. Sheetal, Assistant Professor, Department of Pharmacy, Meerut Institute of Technology speakers for day 5 & 6 delivered lectures on Medical Information Database & Its application /Integration to PV & Drug Safety to the students, IT-Tools under PvPI, Safety Management, and Regulatory Requirements for PSUR to the students.

The program conducted successfully and certificates distributed to the students.

Syllabus

Computer Fundamentals

Scope: This subject deals with the introduction Database, Database Management system, computer application in clinical studies and use of databases.

Objectives: Upon completion of the course the student shall be able to

1. Know the various types of application of computers in pharmacy.
2. Know the various types of databases.
3. Know the various applications of databases in pharmacy.

Unit I **08 hours**

Number system: Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction - One's complement ,Two's complement method, binary multiplication, binary division Concept of Information Systems and Software : Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project

Unit II **08 hours**

Web technologies: Introduction to HTML, XML,CSS and Programming languages, introduction to web servers and Server Products.

Introduction to databases, MYSQL, MS ACCESS, PharmacyDrug database.

Unit III **08 hours**

Application of computers in Pharmacy – Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy, Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring

Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System.

Unit IV **08 hours**

Bioinformatics: Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery.

UnitV **08 hours**

Computers as data analysis in Preclinical development: Chromatographic dada analysis (CDS), Laboratory Information management System (LIMS) and Text Information Management System (TIMS)

AWS Cloud Day Training (Session: 2019 - 2020)

Course Structure

Module 1: Introduction to the AWS Cloud

This module covers the value of cloud and the benefits of adopting AWS Cloud.

Module 2: Getting started with the cloud

This module covers several of the AWS categories and services – what the services do, when and how to use them.

Module 3: Building in the cloud

This module covers several services to support building in the cloud from having scalable applications, monitoring your resources, automating deployments, connecting and sharing data, and content delivery.

Module 4: Secure your cloud applications

This module covers how AWS approaches securing the cloud, along with the AWS Shared Responsibility Model, AWS Access Control and Management, AWS Security Compliance Programs, and resources available to you in better understanding AWS Cloud security options.

Module 5: AWS Pricing, Support and Architecting

This module covers fundamentals of AWS support plans, elements of pricing for several key services, as well as AWS Architecting, which includes the Well-Architected Framework and reference architectures for Fault Tolerance & High Availability and Web Hosting.

AWS (Amazon Web Services) is a comprehensive, evolving cloud computing platform provided by Amazon that includes a mixture of infrastructure as a service (IaaS), platform as a service (PaaS) and packaged software as a service (SaaS) offerings. AWS services can offer an organization tools such as compute power, database storage and content delivery services. AWS launched in 2006 from the internal infrastructure that Amazon.com built to handle its online retail operations. AWS was one of the first companies to introduce a pay-as-you-go cloud computing model that scales to provide users with compute, storage or throughput as needed.

Training was organized on "AWS CLOUD TRAINING" on 06-01-20 to 11-01-20. It was offered once in a year. Time duration of the course was 6 days. 92 students enrolled in course.

In this module, student will learn about the different services provided by AWS. You will be provided with an overview of the important resources required to architect an application. Cloud Computing, Cloud deployment and service models, AWS Global Infrastructure and its benefits, AWS Regions, Availability Zones, and Edge Locations, AWS Services, Ways to access AWS Services: AWS CLI, AWS SDK, AWS Management Console

When gaining knowledge in AWS field, it receives good income which significantly boosts your pay. If you are looking for a bright certification, do AWS course that definitely provides you confidence and increase your pay. It gives edge payment which is possible to update with more things and need for payment. This drastically helps one to gain better outcomes by updating more opportunities in your life.

With an AWS training course certification, you can add some positivity to your resume. Most companies prefer employees owing to an AWS certification. You can receive priority with the enlistment of certification on your resume and can expect great prospects.

While completing the AWS certification, you will get more business opportunities towards shifting the cloud. There will be more opportunities knocking the door so that you will get a

bright career as per the certificate validation. It is working on AWS projects than there will be a slim chance of gaining AWS certification as per the requirements. If you are looking for a job in a company, you should obtain AWS certification forever. There is a demand certification from candidates so that it should obtain a more job opportunity for all. So, it must undergo a well-planned certification suitable for gaining more opportunities anyways.

Apart from students, AWS certification course is greatly helpful for freelancers and employees. It provides the biggest chance so that it could able to identify enough working experience with aws training. It includes digital batches so that you will remain a professional candidate after completing the course. This surely helps freelancer candidates to participate in big projects by having certification. If you are looking for online resources, it should guide you to provide badges as per the decision. Most companies are updating with the right skills for attending AWS training suitable for your future goals. It should gain the confidence of clients in getting AWS projects.

At first, Cloud computing technology has attained a standard role in making proper challenges in recent business sectors. This should undergo by considering further development by handling many businesses as soon as possible. The benefits of learning aws fledge data center by running everything based on the cloud computing formula. It is suitable for every office and technology reveals the success in cloud computing in the data center. The certification training offers basic knowledge in delivering secure and cheap access to the cloud. This is the biggest reason that one should undergo training of AWS and becoming a fresh graduate to secure your future goals.

An AWS certification is always giving the best opportunity to update it to your resume. It should reach the interview table by grabbing it according to the company guidance. Therefore, it provides good updating to your resume by configuring with the right barriers in the resume update. It is vital for positions related to the aws certification value. So, one must attend the training course to get into bright future goals. It is always required to grab it based

on the admin posts and suitable for adding to your resume. It gives a wonderful job opportunity for everyone who completed the AWS course.

After the completion of the workshop, students become proficient in that language and they done mini projects that gives students deep idea about AWS. Before this workshop students have negligible knowledge about AWS, but after that workshop students become adept with this language.

Training was organized on "Advance C Training" on 08-07-19 to 10-07-19. It was offered once in a year. Time duration of the course was 22 days. 21 students enrolled in course.

Most of the theories related to computers like Computer Networks, Compiler Designing, Computer Architecture, and Operating Systems are based on C programming language and require a good knowledge of C programming if you are working on them. In the modern high level languages, the machine level details are hidden from the user, so in order to work with CPU cache, memory, network adapters, learning C programming is a must. C programming language has fewer libraries in comparison with other high-level languages. So, learning C programming also clears programming concepts to a great extent as students have to write lot of things from scratch. Students will not be dependent on the programming language entirely for implementing some basic operations and implementing them on their own will also help you to build your analytical skills. C is extensively used in Embedded Programming.

Embedded Programming is also referred to as micro-controller programming, where C program is used to control micro-controllers. Microcontrollers and embedded programming is widely used in auto-motives, Robotics, Hardwares etc.

As a middle level language, C combines the features of both high level and low level languages. It can be used for low-level programming, such as scripting for drivers and kernels and it also supports functions of high level programming languages, such as scripting for software applications etc. C is a structured programming language which allows a complex program to be broken into simpler programs called functions. It also allows free movement of data across these functions. C language is case-sensitive. C is highly portable and is used for scripting system applications which form a major part of Windows, UNIX and Linux operating system. C is a general purpose programming language and can efficiently work on enterprise applications, games, graphics, and applications requiring calculations. C language has a rich library which provides a number of built-in functions. It also offers dynamic memory allocation.

Today, almost every person is at least familiar with the term "C programming" when it comes to Computer Science. Even a person from a non-technical background has heard about these languages. The establishment of the Information Technology sector first started with fundamental languages like C. Even after several decades of its introduction, C still continues to rein the industries because of its salient features. Some of the jobs students will get if they have good command on C language.

As a junior programmer, students can start off with their coding career. This is the infant stage of coding and students would require at least 3-4 years of coding experience to upgrade to the senior level. This type of job would include basic coding, debugging, reviewing codes, and technical documentation.

Software Developer Engineer post would entail you to carry on all the responsibilities of a software developer with addition to expertise in computer hardware as a software developer engineer. You should be expected to be well-acquainted with the computer architecture system and the digital logic and design of various computer hardware components. Preferably, a person with his B.E/B.Tech degree in computer science or information technology is preferred with a few years of working experience.

Embedded Engineer is one of the striking applications of C is the development of an embedded system as C is closely associated with the machine level language easily understood by the compiler. As an embedded engineer, you would be expected to develop embedded systems. Your eligibility criteria would be a B.E/B.Tech degree in computer science or information technology.

Database Developer this position is required in almost each and every company as it is of utmost importance to maintain a database for an organization to function. The position of a database developer is high in demand. Your task would be to design and modify databases and deal with troubleshooting issues.

Programming Architect as a Cprogramming architect, you would entail to fulfil the criterion of a software engineer with more than 5 years of work experience and have the certificate of development of as many projects in C as possible.

Senior Programmer post is usually given to programmers with more than 3-4 years of coding experience and a definite level of skill set and expertise. Here you would mentor and train junior programmers, you might even have to interact with your client if you're given the responsibility to coach them.

Bio-informatician you would be expected to create biological databases. A person with a degree in computer science with a specialization in bioinformatics is the most preferred for this position. The utmost criterion for this post remains a thorough knowledge of implementing databases using programming languages followed by the basic knowledge of biology.

Software developer would entail you to create and market your own software. It is a respectable position that can be bagged by a person from a person who completed his degree from a technical or non-technical background.

After the completion of the workshop, students become proficient in that language and they done mini projects that gives students deep idea about this language. Before this workshop students have negligible knowledge about the language, but after that workshop students become adept with this language.

Meerut Institute of Technology (Professional Courses), Meerut 1110
Department of Business Administration & Commerce

9-Sep., 2019

Concluding Remarks

Department of Business Administration and commerce has organized a certificate course named Human Values & Professional Ethics 2nd September to 7th September, 2019 for the students of BBA & B.Com I year. Dr. Niyati Garg, the trainer told the students about the need of value education, harmony in self, family, society and nature; apart from these students learned to develop their emotional, social and professional competence.

Students were happy it seems that they have found a new perspective to see the world with reference to relationship, thoughts, behavior, work and realization.

Thanks

Mr. Ankit Gafyan

Concluding Remarks

Department of Business Administration and commerce has organized a certificate course named **Beginners to pro in power point** in two batches i.e. 9-13 December 2019 & 14-18 December 2019 for the students of BBA & B.Com I year. Mr. Rocky Sachan, the trainer told the students about the Basics of Microsoft Power Point & its requirement in the work place. The students learned how to work with Design, Animations and Slide show. The Principal and the trainer awarded the certificate to each participant for the successful completion of their 5 days rigorous training.

Students were glad and promised to practice all these learning.

Thanks

Schedule for Antenna Design using HFSS Training (02/12/2019 to 07/12/2019)

	Session	Topic
Day 1	Session 1	Basics of Microwave Theory
	Session 2	Basics of Components and Applications.
	Session 3	Software basic Knowledge
	Session 4	Different types of Antennas
	Session 5	Dipole Antenna
Day 2	Session 6	Horn Antenna
	Session 7	Patch Antenna
	Session 8	Waveguide T-junctions
	Session 9	Magic Tee
	Session 10	Filters, RCS
Day 3	Session 11	Hybrid Ring
	Session 12	Cavity Resonators
	Session 13	Magic TEE
	Session 14	E-Plane TEE
	Session 15	H-Plane TEE
Day 4	Session 16.	Simulation of Horn Antennas (E Plane, H Plane, Pyramidal, Conical)
	Session 17	Simulation of Dipole Antennas (Half Wave Dipole, UHF Probe, Yagiudda)
	Session 18	Simulation of Helical Antenna
	Session 19	Simulation of Microstrip Antenna (Coaxial Fed, Microstrip line Fed, Slot Coupled)
	Session 20	Simulation of Ferrite Circulator
Day 5	Session 21	Simulation of Microstrip Array
	Session 22	Simulation of Filters,
	Session 23	Simulation of Microstrip Array
	Session 24	Simulation of Application oriented design
	Session 25	Hybrid Ring
Day 6	Session 26	Introduction to Hardware Testing
	Session 27	Radiation Pattern
	Session 28	Gain, Directivity
	Session 29	Reflection Coefficient
	Session 30	VSWR
